 MySurgeryWebsite

TESTIMONIALS

"I have the greatest respect for the people at this company. The PCT pay thousands to clinical suppliers - all offer a barely adequate software support solution. We pay these guys £229 a year and they are brilliant"

"A very well thought out and fast loading informative site. Up to date, particularly podcasts and men's health, which normally take a back seat on comparable sites, Excellent, very impressed"

"I have now had the opportunity to trawl your web site and congratulate whoever put it together. The site is very user friendly and easy to navigate. Many questions arising are answered well and directions to referrals are simple. Well done."

"The site is fantastic. Simple and intuitive navigation make it very quick to use. The facility for repeat prescriptions is excellent. "

"Good website, very accessible and understandable, I have to applaud the practice for this. I use jaws screen reader software developed for people with impaired vision or no sight at all."

Create a Website for your Practice

Affordable - with no setup fee and only £229 plus VAT per annum, a My Surgery Website is cost effective for your practice

Quick & Simple Setup - send us your practice leaflet and your website will be ready within a week.

Easy to Edit - with our built in website editor you can change content and style yourself. It is as easy as editing a word document

Professional Hosting & Backup - With the best servers and backup facilities your website is always in safe hands

My Surgery Website is the largest supplier of Websites & Intranets to the primary care market. With over 800 practices offering services to more than 3 million patients we can help your practice get a new website up and running quickly and affordably.

Designed specifically for general practice and packed with useful information and links, your site will offer all of the interactive features you would expect from a professional practice website - and because it is built from your practice leaflet, not only is it personal and particular to your surgery but all the work is done for you.

Recent patient surveys across the UK have shown an increased demand by patients for access to online services. We understand that you do not have the time or resource to develop a website within the practice - that is why we are here to help.

We make the process simple for the practice and once the website is live, you can edit it yourself! There is no web-development required, it is as easy as changing a word document.

Why not visit our website and see what we can offer -

With the recent announcement of the NHS targets for reducing carbon emissions, we feel it is an important time to be focusing on the importance of telemedicine and health.

Using our online services can significantly reduce the number of visits patients make to the surgery. We handled over half a million online prescription requests last year alone which helped our practices reduce their carbon footprint.

Not only will your practice benefit from a reduction in travel for patients, but your website will be hosted in an environmentally friendly setup.

Our servers are hosted in a new UK data centre which is run on renewable energy. Best practices are used to keep energy requirements to a minimum with efficient hardware and equipment

Every little helps!

MySurgeryWebsite

Easy Website Setup

1. Send us your practice leaflet

2. Website set up by our development team

3. Website live within a week

Surgery Intranet

We also provide an intranet product for general practice. This allows the practice to have a central point for all documents and information and includes many useful features such as shared calendars, contacts, holiday planner, schedule, room diary and much more. Visit our website for further information.
